Experience

Software Engineer (Research Staff) — Dec. 2024 – Present
Universidad Autónoma de Madrid – MISO Research Group — *Madrid, Spain*

- Built and deployed a full-stack platform that unified chatbot testing tools in a single system using React, Tailwind CSS, Django REST, PostgreSQL, Celery, Docker, and Nginx.
- Designed backend workflows for API integration, asynchronous task orchestration, and data persistence across evaluation and profiling pipelines.
- Developed TRACER and an LLM-based profiling pipeline with LangGraph and OpenAI APIs to explore chatbots, extract functional models, and generate reusable test scenarios and user profiles.
- Implemented CI/CD and release automation with GitHub Actions, including Python package publishing to PyPI, while collaborating in a shared codebase through pull-request workflows.

Projects

CertiCamper | *Full-Stack Web Platform* [Website] — Present

- Developing a platform for a vehicle engineering consultancy that replaces fragmented email and document workflows with a guided customer portal for camper van homologation.
- Building the end-to-end system with FastAPI, React, TypeScript, PostgreSQL, Docker, Cloudflare R2, OpenAPI-generated clients, automated testing, authentication, RBAC, quote and payment flows, and dynamic submission forms.

Obsidian Smart Export | *TypeScript* [Code] [Website] — Present

- Built and now maintain an open-source Obsidian plugin used by 1.9k+ users to export structured knowledge graphs to Markdown.
- Implemented BFS-based graph traversal over wikilinks to preserve note structure during export, and set up GitHub Actions release automation for the plugin and website deployed on Vercel.

U.D.I.N. | *C++, WPF, Microsoft Word Automation* — 2025

- Built a Windows desktop application that automates vehicle modification homologation documentation in Spain.
- Replaced repetitive manual work by generating the three official engineering documents required for regulatory approval in a closed-source tool used by a professional in the automotive sector.

Education

Universidad Autónoma de Madrid — Madrid, Spain
MSc in Data Science — *Sep. 2024 – Jun. 2025*

- Thesis (10/10), published: *Automated Exploration of Conversational Agents for the Synthesis of Testing Profiles*. GPA: 8.41/10; Highest Honors in Recommendation Systems.

Universidad Autónoma de Madrid — Madrid, Spain
BSc in Computer Science — *Sep. 2020 – Jun. 2024*

- GPA: 8.31/10; Highest Honors in Data Structures and Mobile App Development; Excellence Scholarships in 2nd and 4th year. International study at University of Helsinki and Northwestern Polytechnical University.

Technical Skills

Programming Languages: Python, JavaScript/TypeScript, Java, C/C++, Kotlin, SQL, Bash
Backend & Systems: Django, FastAPI, REST APIs, PostgreSQL, Celery, RabbitMQ, Docker, Nginx
Frontend: React, Vue, Astro, Tailwind CSS
AI / Data: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, SHAP, LangGraph, OpenAI API
Tools: Git, GitHub Actions, Linux, Vim, VS Code, Jupyter, LaTeX
